Certified Public Accountants and Advisors

Eisner & Lubin was looking for a total overhaul of their site, their branding, and a warmer approach to their industry. They wanted to combine the tradition and history of their firm and business with the more personal aspect of their advisory capacities, with an open, inviting color scheme and layout. Lounge Lizard provided sunny tones, earthy greens, and rich chocolate as their color palette, and added interesting textures like lined accounting paper and grained leather for that cozy feel. Lounge Lizard also used cutting-edge graphics to create special effect headers that really headlined, and developed an innovative, user-friendly client portal to allow for safe upload and download of client files. An interface that was easy to navigate polished off that bit of custom development, accented by their new logo.

next >

Eisner & Lubin wanted a total overhaul, to combine the tradition and history of their firm and industry with the more personal aspect of their advisory capacities. LL built an innovative secure client portal for document storage, taking filing online, and coded it up with fun textures and sunny, earthy colors.
