

Sea Point: A Port Server

sea-point.net

Sea Point, a high volume Port Server servicing Middle America and the Gulf Coast, approached Mudbug Media to achieve a cleaner, more interactive website to replace the sparse and outdated site that had been in place. User friendliness and accessibility to clients was a primary focus, and Mudbug Media delivered with ingenuity, designing a custom application called the Document Room allowing users to upload files to a password protected site. Clients are now able to browse key documents through a secure medium with effortless ease. Distinctive, crisp graphics, a beautifully organized layout, and the addition of rich yet subtle hues completed the redesign, bringing Sea Point's online image to modernity.
